Year 5 Term 3 Renewable Energy

Reading Assessment

Vocabulary

1. Which of these words has a similar meaning to sustainable?

a) worthwhile b) continual

b) renewable d) environment

2. What does it mean if something is renewable?

a) it is able to be replenished b) it can't be used again

c) It is new c) it doesn't stop

1. What word describes something that is abundant?

a) scarce b) some

c) plentiful d) shortage

1. Describe in your own words what 'pollution' is.

1. _____
is renewable energy?

Sentence Level Writing

1. Complete this Because, But, So:

energy is good because

energy is good, but

energy is good, so

1. Choose an appositive to add to each of these sentences:

the first part of an information report

titles for different sections in an information report

a type of writing that presents facts about a topic

the final part of an information report

1. An information report _____, helps readers learn new things.
1. The introduction, _____, gives an overview of the subject.
1. A conclusion, _____, summarizes the main points discussed.
1. Subheadings, _____, help organize the information clearly.

1. Combine these sentences.

Renewable energy is good.

Renewable energy reduces fossil fuels.

Renewable energy has advantages.

Renewable energy has disadvantages.

Renewable energy is energy that comes from natural sources which are always available. Unlike fossil fuels, which can run out, renewable energy sources are sustainable and help protect our planet. Using renewable energy helps reduce pollution and the effects of climate change.

Types of Renewable Energy

There are several types of renewable energy, each with unique benefits. Solar energy, which uses sunlight to create electricity, is one of the most popular forms. Wind energy, captured by wind turbines, is another important source. Hydropower, which generates electricity from flowing water, and geothermal energy, which uses heat from inside the Earth, are also valuable renewable energy sources. These clean energy options are crucial for a healthy and sustainable future.

Benefits of Renewable Energy

Renewable energy offers many benefits beyond just reducing pollution. It can also create jobs, as many people are needed to build and maintain renewable energy systems. Additionally, renewable energy can help reduce energy costs in the long run because sunlight, wind, and water are free resources. By using renewable energy, we can also reduce our dependence on imported fuels, making our energy supply more secure and reliable.

1. Why has the author used sub headings in the text above?

- b) Explain why an information report would have an introduction?

c) The text mentions different types of renewable energy. What are they?

d) Do you think renewable energy is a good idea? Explain why or why not? Give reasons for choice.
